February 13, 2023

To whom it may concern:

It is with great enthusiasm that I write this letter in support of Frédéric-Alexandre Lefebvre's application to the Bachelor of Computer Science (BCompSC) in the Gina Cody School of Engineering and Computer Science at Concordia University. Frédéric-Alexandre and three of his teammates are currently working on an applied computer science project titled "Internet student recruitment system (ISRS)" under my supervision in the Concordia Institute for Information Systems Engineering. ISRS is a Web application that would allow employers to search and select potential candidates for their workplace. Many employers are having such a hard time finding adequate candidates for open positions in their tech firms. The aim of ISRS is to facilitate the search, screening and evaluation of potential job candidates by hosting a live database with real-time information on students who are currently enrolled in a college or university.

I am very impressed by Frédéric-Alexandre's technical skills and keen interest in computer science. He is a very motivated and enthusiastic young man, scientifically curious and probing, passionate about computer programming, and displays an incredible eagerness to learn.

In summary, I strongly and very enthusiastically recommend Frédéric-Alexandre for the program he is applying for. Should you wish further information, please do not hesitate to call on me either by phone 514-848-2424 ext. 5715 or by e-mail: hamza@ciise.concordia.ca

Sincerely,

Abdessamad Ben Hamza, *PhD*, *PEng*
Professor and Director
